## Freight Projects in the

## **Maryland Consolidated Transportation Plan**

Maryland's economy moves on a balanced freight network. Ensuring that the network of highways, railways, waterways, and airports are ready to handle the current level and anticipated growth of goods movement is a priority of the Maryland Department of Transportation (MDOT) and its modal administrations. To meet these needs, MDOT is taking an aggressive approach to implement multimodal freight solutions in Maryland and the greater multi-state region, as demonstrated through the below list of multimodal freight projects from the 2014-2019 Consolidated Transportation Plan.

**Highway Projects** 

**Port of Baltimore Projects** 

**Shortline Rail Projects**
